

What *do* Women Want?

Hyndburn Women's Forum has been in existence for over 15 years. In that time the group has held many events to celebrate International Women's Week, including the What Women Want conferences, the controversial play *The Vagina Monologues*, various community events and of course, the Open Minds Festival in June 2009 with Germaine Greer as a key note speaker.

Over the years funding has become increasingly hard to find and other Women's organisations have been launched or grown and have included International Women's Week events in their provision.

Now is the time to question whether there is a role for a group whose sole objective is to organise activities to celebrate International Women's Week. Join the debate.....
